

Uttam Kanojiya

Data Science & Data Analytics

Mumbai, India | +91-7304217575 | uttamhkanojiya@gmail.com | github.com/uttamkanojiya

PROFESSIONAL SUMMARY

Computer Science graduate with a blended skill set spanning data science and data analytics, including Python, SQL, machine learning, and Power BI. Experienced in data cleaning, exploratory data analysis (EDA), predictive modeling, and dashboard development. Seeking an opportunity to apply both analytical and machine learning expertise to solve real-world business problems.

TECHNICAL SKILLS

Programming & Querying: Python Automation, SQL

Data Science & ML: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, Predictive Modeling, EDA

Data Analytics & BI: Power BI Dashboard Development, Excel, KPI Reporting, Data Visualization

Tools & Platforms: Git, VS Code, Power BI Desktop, Postman, Jupyter Notebook, Google Colab

PROJECTS

House Price Predictor *(Feb 2026)*

Tech Stack: Python, Scikit-learn, Pandas, NumPy

- Built a machine learning regression model to predict house prices based on property features.
- Performed data cleaning, feature engineering, and exploratory data analysis (EDA) to improve model accuracy.

Sales Performance Dashboards *(Jun 2026 - Jul 2026)*

Tech Stack: Power BI Desktop, Excel

- Built multiple interactive Power BI dashboards to analyze sales trends, regional performance, and customer behavior.
- Designed KPIs and data visualizations to support data-driven business decision-making.
- Delivered actionable insights used for sales and regional performance tracking.

RAG-Based AI Teaching Assistant *(Mar 2026 - May 2026)*

Tech Stack: Python, Ollama (LLaMA 3.2), RAG Architecture

- Developed a Retrieval-Augmented Generation (RAG) based AI teaching assistant that allows users to upload course videos and receive AI-generated answers to course-related questions.
- Implemented a local LLM pipeline using Ollama's LLaMA 3.2 model to process and respond to natural language queries.
- Collaborated with course tutor to design and refine the retrieval and response pipeline.

Friend Recommendation System *(Jan 2026)*

Tech Stack: Python

- Designed and implemented a recommendation system that suggests potential user connections by analyzing user relationships and interaction patterns.
- Applied data analysis techniques to uncover behavioral patterns within user interaction data.

EDUCATION

B.Sc. in Computer Science | Mumbai University | CGPA: 8.67/10 | 2026

Bachelor's Degree

HSC (Class XII), Science | Maharashtra State Board of Secondary and Higher Secondary Education | 60.33% | 2023

SSC (Class X) | Maharashtra State Board of Secondary and Higher Secondary Education | 76.20% | 2021

Languages: English, Hindi, Marathi
